SPG SUMMIT POINT GROUP

INTEGRATED MISSION SOLUTIONS

Advancing Technology. Preparing People. Supporting the Mission.

One partner supporting technology and personnel across the full capability lifecycle — Research, Development, Test & Evaluation, Training, and Mission support. Summit Point Group helps government, prime contractors, and technology companies develop, evaluate, operationalize, and sustain critical capabilities.

INTEGRATED SOLUTIONS FOR COMPLEX MISSIONS.

▶ THE MISSION LIFECYCLE

From Innovation to Operational Readiness.

RESEARCH » DEVELOP » TEST » EVALUATE » TRAIN » DEPLOY » SUSTAIN

Summit Point Group connects RDT&E and training to deployment and sustainment — one accountable partner across the full lifecycle.

▶ WHY SUMMIT POINT GROUP

RDT&E, TRAINING, AND MISSION SUPPORT UNDER ONE OPERATING MODEL
Capabilities move toward the field with fewer seams.

A NATIONAL, SECURE TEST NETWORK
A flagship campus with unrestricted Class E & G airspace near the nation's capital, anchoring sites across the country.

OPERATOR-INFORMED
Shaped by people who have operated in the environments our customers face — not just studied them.

ONE ACCOUNTABLE PARTNER
Development, testing, training, and sustainment delivered by a single team. No handoffs, no gaps.

FIFTY YEARS, AT SCALE
More than five decades of operational heritage, now operating at national scale.

▶ OPERATING MODEL

Mission Capability, Supported by Specialized Infrastructure.

(SPG) Delivers the Mission • (SPTTC) Enables the Place

SPG
SUMMIT POINT GROUP
Mission & Services

- *Research, Development, Test & Evaluation*
- *Training & Mission Readiness*
- *Mission Support*
- *Emergency Services*
- *Program Execution*

SPTTC
SUMMIT POINT TECHNOLOGY & TRAINING CAMPUS (SPTTC)
Property & Infrastructure

- *Research campus*
- *Specialized facilities*
- *Testing infrastructure*
- *Government & industry leasing*

Research, Development, Test & Evaluation (RDT&E)

Where innovation meets operational reality.

Summit Point Group operates a secure, full-spectrum RDT&E environment for U.S. Government and industry partners — supporting technology development, experimentation, demonstration, and operational testing across UAS and Counter-UAS, autonomous and vehicle systems, sensors, and AI-driven capabilities. Class E and Class G unrestricted airspace, purpose-built ranges, and full wrap-around logistics move capabilities from concept to field-ready with fewer seams.

- *E & G Airspace*
- *Integrated Lifecycle*
- *Secure & Compliant*
- *Operator-Informed*
- *Speed to the field*

The flagship 786-acre campus near Washington, D.C. pairs Class E and Class G unrestricted airspace with dedicated range complexes, driving circuits, secure storage, and modern office, laboratory, and classroom space. The campus anchors a portfolio of properties across the broader Southeast and the country. When a program needs more than the existing footprint, SPG identifies, secures, and stands up new locations - so test capacity goes where the mission needs it.

UAS & COUNTER-UAS TESTING

AUTONOMOUS & VEHICLE SYSTEMS TESTING

SENSOR, AI & EMERGING TECH EVALUATION

FIREARMS & EXPLOSIVES RANGE TESTING

PRODUCT DEMONSTRATIONS & LIVE TRIALS

RDT&E LOGISTICS, WAREHOUSING & STORAGE

Training & Mission Readiness

Preparing people for the environments they actually operate in.

For more than 50 years, Summit Point has prepared government, law enforcement, and commercial personnel for high-threat, high-consequence environments. Summit Point Group delivers advanced driver, firearms, medical, special-skills, and specialized operational training built around one standard: real-world readiness. Our instructors are drawn from Special Operations, law enforcement, and professional-driving backgrounds, and they teach the way our clients operate.

- *Multiple Paved Driving Circuits*
- *Multiple Firing Ranges*
- *Skid Pads & Wet Tracks*
- *Scenario Tactical Zones*
- *50+ Years Experience*

Programs are delivered two ways: custom courses engineered to a specific objective, and predesigned open-enrollment curricula with certifiable outcomes - backed by in-house curriculum development, range management, role-player support, and live-virtual-constructive mission rehearsal. Multiple disciplines train simultaneously on one campus, building cross-domain readiness in a single evolution.

Mission Support

Keeping the mission running — at home and downrange.

Summit Point Group provides the operational backbone that keeps critical missions ready and running. As a trusted U.S. Government contractor, SPG delivers comprehensive base operations, facility management, logistics and sustainment, construction management, professional advisory, emergency medical, and staff-augmentation services — domestically and internationally.

- *U.S. & International Reach*
- *On-Site & Embedded*
- *Single Accountable Partner*
- *Routine Through Contingency*

Mission Support is where Summit Point Group's breadth becomes a single, accountable capability. Rather than coordinating a patchwork of vendors, customers work with one partner who can stand up and sustain the facilities, logistics, people, and programs a mission depends on — from day-to-day base functions through global contingency and stability operations.
